SOVRA April 2025 Product Release

Smarter Procurement Through Contextual Insights & Customer-Led Innovation

The April 2025 release introduces productivity-driving features across sourcing, contracting, and evaluation—putting real-time insights and automation in front of users without requiring extra clicks or reports. From a redesigned homepage to intelligent vendor tools and improved solicitation controls, SOVRA continues to deliver on user-driven enhancements designed for the realities of public procurement.

Feature Overview

Redesigned Actionable Homepages

Source Pro

What's New

> New role-based homepages double as dashboards, showing real-time procurement indicators

> Surfaced tasks and grouped insights improve navigation and reduce "dashboard-hunting"

Benefits

> Boosts productivity with prioritized, at-a-glance views

> Minimizes manual tracking and follow-up

> Enhances visibility into time-sensitive activities

Pavilion Search Bar Integration

Source

What's New

> Users can now search Pavilion contracts *before* launching a new solicitation

> Enables discovery of existing, shareable contracts already available

Benefits

> Reduces unnecessary solicitations

> Promotes contract reuse and collaborative procurement

> Accelerates time-to-value while preserving compliance

Customer-Driven Enhancements

These features originated from direct customer feedback and user advocacy, reinforcing SOVRA's commitment to continuous, customer-centric improvement.

Pre-Attached Document Ordering

Source

What's New

> Solicitation templates can now define not just *which* documents are required, but also the *exact order* they appear to vendors.

Benefits

> Ensures vendors review materials in a logical sequence

> Reduces confusion, questions, and back-and-forth

> Promotes higher-quality, compliant responses from vendors

Reopen Consensus Evaluation

Source

What's New

> Consensus evaluation scores can be reopened and modified post-submission

> All updates are audit-logged and fully traceable

Benefits

> Enables correction of errors or oversights during evaluation

> Maintains auditability and compliance

> Adds flexibility to a traditionally rigid process

Approval Path by Buyer

Source Pro

What's New

> Configure approval workflows based on individual buyer identity

> Expands on existing role-, group-, or threshold-based rules

Benefits

> Improves alignment with internal operational processes

> Adds precision to automated workflows

> Enhances governance without adding administrative overhead

Excel Upload/Download of Line Items

Source Pro

What's New

> Bulk upload and download of line items using Excel

> Performance enhancements yield 3x speed improvements

Benefits

> Essential for agencies managing high-volume solicitations

> Saves hours of manual entry and import/export effort

> Supports quick revisions and mass updates

Product Roadmap Vision

SOVRA's product strategy is guided by five core principles

Security, compliance, and trust

Accelerated innovation

Data-driven insights

Seamless supplier collaboration

Customer-centric excellence

*We will continue to invest and develop solutions to **empower you, our Public Procurement customers,** to deliver efficiency and build confidence in your solution.*
